

Acoustic noise generator - RDK-2000 ANG Rapid Deployment Kit for eavesdropping interfering

RDK-2000 ANG Rapid Deployment Kit - Acoustic noise generator designed for different types of eavesdropping interfering

RDK-2000 ANG Rapid Deployment Kit is a complex solution for rooms counter-surveillance and eavesdropping prevention. The kit primarily consists of two high class acoustic noise generators ANG-2200, which are adjusted to the conditions in a particular room.

RDK-2000 ANG Rapid Deployment protecting kit is designed for protection of medium sized rooms and a set of accessories provides efficient **barrier from information leaking**. Wiring, installation sets and software allow for comfort operation, **bandwidth leaks analysis** and configuration.

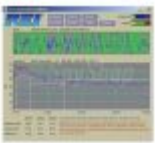

Acoustic noise generator RDK-2000 ANG Rapid Deployment Kit protects from different threats such as:

- wall contact microphones,
- wired microphones hidden in walls,
- eavesdropping devices hidden in buildings installation,
- laser and microwave microphones.

Acoustic noise generator - RDK-2000 ANG Rapid Deployment Kit consists of

[Acoustic noise generators](#) Professional tool by the American brand REI enables for creating a signal, which allows for efficient protection from in and out eavesdropping in the room.

[Acoustic spectrum analysis software ASA-2000](#) Programm Audio Spectrum Analysis was created for the needs of specialized measurements and analysis of sound, which is absorbed by the structure of the building.

[TRN-2000 transducer for ANG-2200 acoustic jammer system](#) Vibro-acoustic jammer system TRN-2000 is a part of the kit protecting from eavesdropping. It Prevents the acoustic signal from leaking outside the room, which must be protected.

[Transducer window mount WMT-2000](#) Transducer window mount WMT-2000 can be allows for simple installation of TRN-2000, which is a component of the system ANG-2200.

• [OMS-2000 speaker for AGN-2200 acoustic noise generator](#) OMS-2000 is a multi-directional speaker, which is a part of the ANG-2200 counter-surveillance system.

• Connection cable Connection cable with length of 300 m (2 × 150 m).

• Tool set Tool set with the tools for the RDK-2000 ANG Rapid Deployment Kit installation.

• Transport case Transport carrying case with wheels.

• **Important info**

- We sell counter surveillance systems **ONLY to authorized institutions.**

Acoustic noise generator - RDK-2000 ANG Rapid Deployment Kit for eavesdropping interfering

- White noise generator ANG-2200 - 2 pieces
- TRN-2000 transducer for ANG-2200 acoustic jammer system - 24 pieces
- WMT-2000 transducer window mount (ANG-2200 system) - 24 pieces
- OMS-2000 speaker for AGN-2200 acoustic noise generator - 2 pieces
- Audio Spectrum Analyzer ASA-2000 - Acoustic Spectrum Analysis software
- Connection cable 300m (2×150m)
- Tool set
- Transport case on wheels
- User manual
